Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 7-8, drawn to immunogenic protein and method of making, classified in Class 424, subclass 230.1.

Group II. Claims 5, 17-18, drawn to nucleic acids and host cells, classified in Class 536, subclass 23.72.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are directed to products which differ in their physical, chemical, and immunological properties such as primary sequence and chemical composition and are unobvious in view of each other.

3. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as immunizing an animal to make monoclonal antibodies or for use in a diagnostic assay.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
